

WHITE-PAPER

BabyBee

INTRODUCTION

"The **BabyBEE** crypto meme community is an innovative fusion of technology and philanthropy, working tirelessly to make crypto accessible to everyone and help those who need it most."

"**BabyBEE** leverages Binance Smart Chain's cutting-edge technology to make cryptocurrencies accessible and efficient. With ultra-fast block times and low gas fees, the community can transact quickly and cost-effectively, contributing to the mass adoption of cryptocurrencies ."

"**BabyBEE-X** is proof that crypto memes can go beyond fun to inspire nobler purposes. Created by online meme fans, the community is helping drive cryptocurrency adoption and making a difference in people's lives."

BabyBEE raises the bar for memes by including solidarity actions in its initiatives.

With its innovative and inspiring approach, **BabyBEE** is setting a new standard for the world of memes, showing that it is possible to make a positive impact and do good while having fun.

The more you use **BabyBEE-X**, the more you earn. With automatic liquidity distributions and a hyper-deflationary model, this innovative cryptocurrency is the right choice for those looking for a constantly growing portfolio.

Hyper-deflationary is an economic policy that seeks to reduce the monetary supply in circulation at an accelerated rate, with the aim of increasing the value of a given currency. This is usually done by burning a percentage of the currency in circulation or automatically sending a portion of the currency to the liquidity pool. With fewer units of currency in circulation, supply becomes scarcer and, consequently, the individual value of each unit increases. This policy is commonly used in cryptocurrencies to encourage currency appreciation and reduce its volatility. And **BabyBEE** uses both actions together.

BabyBEE is more than just a cryptocurrency project, it's a community initiative that aims to revolutionize the way people interact with digital money.

Unlike many other cryptocurrencies, **BabyBEE** is a project that focuses on building a vibrant and collaborative community, where every participant has a voice and active participation in shaping the future of the project.

OF THE LEGAL PART

BabyBEE, including but not limited to the overall design, token, website, smart contracts and any applications (“**BabyBEE**”) as presented in this concept paper, is not a licensed, unlicensed or exempt financial or payment service of any kind and in any jurisdiction. Any terminology used in this **White-paper**, on the website or in the app is only a basic reference, without any effective or legal meaning of the same terms in a regulated and/or financial environment. **BabyBEE** is a community driven project.

BabyBEE smart contracts are open source, security audited, permanent and not modifiable in any way. The **BabyBEE-X** token is strictly a meme utility token in all jurisdictions and is not and cannot be considered a “security” or regulated token of any kind. **BabyBEE-X** is in no way e-money and/or fiat money, or an asset-backed stable-coin, whether global or limited in scope.

This **White-paper** by itself is not a contract or contractual agreement of any kind, nor is it an invitation, solicitation or offer to invest in **BabyBEE** or acquire or use **BabyBEE-X** Tokens in any way and with any expectation of profit therefrom.

Any **BabyBEE** user represents and warrants that such user has received appropriate technical, administrative, regulatory and legal advice before and after accessing and/or reading this **White-paper** or the Site, and/or using any part or element of **BabyBEE** (including the **BabyBEE-X** token coin). User acknowledges and accepts that there is an inherent high risk in accessing, acquiring or using any type of blockchain and/or cryptographic system, token, swap platform or interface, including **BabyBEE**, and further rejects any claim of any kind against any member of community directly or indirectly involved with **BabyBEE**, for any damage suffered, including total loss. **BabyBEE** will make several digital tools available on its website exclusively for the convenience of users. **BabyBEE** is built on the Binance Smart Chain with lightning-fast block times and cheaper gas fees than Ethereum.

BabyBEE is not a traditional investment and should not be treated as such. Participating in BabyBEE can lead to significant losses, so please do your research before getting involved.

01 SUMMARY

BabyBEE Big dream

Born in March 2023, **BabyBee Coin** is more than a cryptocurrency, it's a movement. We're combining a passion for fun with a mission to help those in need. With innovative digital solutions and a unique approach to cryptocurrency adoption, we are leading the way to a fairer and more equitable future.

In June 2024, **BabyBEE** updates its token and replaces **BabyBee Coin** with **BabyBEE-X**. The exchange was necessary to alleviate transaction fees and facilitate the circulation of the asset across the network.

SmartHIVE

It is a smart contract where, when interacting with it, users spontaneously contribute to the **BabyBEE** project achieving its goals of solidarity actions and with this, users also participate in an intelligent way of disseminating **BabyBEE-X** to as many people as possible in a short space of time, where everyone will reap benefits from distributions and bonuses and **BabyBEE-X** tokens. **SmartHIVE** goes into operation on February 9, 2024.

BabyBEE Brazil Institute

BabyBEE is ready to take the use of meme tokens to the next level, implementing an institute that will aim to support young people in vulnerable situations by bringing them to an environment where they will receive training in the technological area, training in artificial intelligence, Blockchain, SmartContracts , etc...

BabyBEE NFTs

BabyBEE will have its collection of **NFTs** on the market and following the same concept for which it was born, **NFTs** will always have a direct impact on the solidarity actions that **BabyBEE** is involved in.

BabyBEE DAO

BabyBEE is creating a new model of decentralized governance, where the community is responsible for deciding rules, improvements and choosing charities to receive donations, demonstrating the true power of decentralization bringing true democracy to the world of cryptocurrencies.

02 VALUES

TRANSPARENCY

At **BabyBEE**, we encourage open communication and believe that transparency and trust are key to maintaining a strong and cohesive community, ready to face any challenges that come along our journey.

RELIABILITY

BabyBEE understands that transparency is the key to building a trusted and secure community in the cryptocurrency market.

That's why we strive to maintain full transparency not only in our community and development, but also in our security efforts, ensuring the trust of our users.

BabyBEE will adopt a stance of complete transparency and security, carrying out third-party audits and protecting its core liquidity by burning its LPs.

Equality is a fundamental value that we defend in our community, as we believe that everyone deserves respect, dignity and equal opportunities.

COMMUNITY

BabyBEE values inclusion and diversity, looking to build a strong community where everyone can grow and express themselves freely.

In our community there is no distinction of gender, race, age or sexual orientation, everyone is welcome at **BabyBEE** and treated with respect and dignity.

At **BabyBEE**, we value decentralization in all aspects, including managing Telegram channels. Our team authorizes members to manage main channels in each country, while we allow other members to create and manage their own channels.

LONGEVITY

On **BabyBEE's** journey, the community is our greatest ally. Together, we will be committed to promoting the long-term development of the ecosystem and making **BabyBEE-X** a useful and valuable token, while helping charities.

03 BABYBEE-X

Binance Smart Chain (BSC) is a blockchain designed to deliver solidity-based smart contracts with speed and efficiency superior to other competing blockchains. With its decentralized exchanges offering extremely low fees and lightning-fast transactions, BSC has become a top choice for DeFi projects. Utilizing the BEP-20 token protocol developed by the team at Binance, BSC offers blocks with block speeds of just 5 seconds, making it faster than many other blockchains with block times of 1 minute. Comparative studies prove the efficiency and speed of the BSC.

Doge 1 Minute:

<https://coinsutra.com/transaction-speeds/>

Bep-20/BSC 5 Seconds:

<https://trustwallet.com/blog/binance-smart-chain-in-numbers>

There are several advantages to use the Binance Smart Chain, such as:

Blockchain designed with a focus on protecting users and developers alike, allowing everyone to have confidence that their data is safe and secure.

Binance Smart Chain enables fluid interaction between different blockchains, enabling an enhanced user experience in high-performance dApps.

Binance Smart Chain is fully EVM compliant, meaning it is capable of running all smart contracts and decentralized applications that were developed on Ethereum. In addition, BSC offers faster and cheaper transactions, allowing users to transact efficiently and cost-effectively.

Network governance is distributed on-chain, using the Proof of Stake Authority consensus, which is based on 21 validators to validate transactions and ensure a more decentralized and inclusive governance model.

Although BabyBEE uses Binance Smart Chain's smart chain network, it is important to clarify that the network is decentralized and BabyBEE has no control over the actions of users and validators on the network, therefore it is not responsible for their actions.

04 ECOSYSTEM

Powered by the Community

BabyBEE is a vibrant and fun community that will be wholly owned by its community. We believe in inclusivity and value diverse perspectives to make **BabyBEE** the best crypto community possible.

In addition, our mission is to help and support various charities, aiming to make a positive difference in the world.

Instant Rewards

By keeping the **BabyBEE-X** token in your wallet, you will be rewarded with its appreciation due to the deflationary model implemented in your contract where with each purchase and sale 1% of **BabyBEE-X** are burned and 2% are sent directly to liquidity, all of automatically, making **BabyBEE-X** scarce on the market.

Liquidity and Development Fund Locked

To ensure the stability and security of the **BabyBEE** ecosystem, BabyBEE-X's main liquidity has its LPs burned, so the team will never have any access to liquidity to withdraw it. Additionally, a 1.5% fee is applied to all transactions which are automatically added to main liquidity, increasing market depth and facilitating the buying and selling of **BabyBEE-X**.

For **BabyBEE-X** to have its natural appreciation, a 2% fee was also applied to all transactions that are burned, with this **BabyBEE-X** has a constant and continuous reduction, causing it to become more scarce every day, becoming to a continually growing crypto meme.

99% of **BabyBEE-X's** total supply was blocked on **Pinksale** with an unlocking schedule of 1% each month, meaning the team did not access the total supply, avoiding the risk of dumping liquidity, thus bringing even more security and community trust.

Here you can track all locked tokens: [Click Here](#).

05 BABYBEE PROTOCOL

BabyBEE takes a deflationary approach with three functions built into its contract: Distribution, Automatic Liquidity and Instant Burn. Furthermore, its main liquidity has its LPs burned and its reserve blocked with a monthly release of 1%, guaranteeing the security and stability of the ecosystem.

For each monthly release of your reserve, **BabyBEE** separates a portion to meet your goals and objectives, this distribution happens as follows.

50% is inserted as a contribution in **SmartHIVE**

2% marketing actions

2% solidarity actions chosen by the community

2% project development

Supply Total: 9.000.000.000.000.000

Blockchain: Binance Smart Chain
